

Freedom of speech is one of the most basic freedoms our constitution guarantees. I find it so hard to believe our own elected and/or appointed officials would undermine the very foundations of our nation by allowing only a few the right to have their say. We have a trend today toward the "mega-corp" and are trampling on the small or individual business owners and/or farmers that have been the backbone of this country. By silencing the voice of all opposition we will replace the USSR as the most powerful dictatorship. This is not the future I want for my grandchildren! Please do not allow this to happen.
